Fresh twist: the spiraling images of a rediscovered painter

Neil Stokes was a peer of Hockney, a protege of Bacon — yet he remains under the radar.

Stokes’s oeuvre is full of geometric tricks, but there is something inherently romantic about a man who left behind a legacy of work that so many people have forgotten.

He was a digital artist, a painter, a sculptor, and a photographer. His work was full of color and movement, and he was able to capture the essence of a moment in time with his brushwork.

One of his most famous works is a painting of a woman lying on a bed, with a man sitting beside her. The painting is full of color and emotion, and it captures the beauty of the moment.

Another of his works is a painting of a man and woman standing next to each other. The painting is full of emotion, and it captures the beauty of the moment.

Stokes was a prolific artist, and his work has been exhibited in galleries and museums all over the world. He was a trailblazer in the world of art, and his work has inspired many other artists to follow in his footsteps.

He was a true artist, and his work will continue to inspire and amaze for years to come.
